

# Where and How to Download EndNote (EndNote X1 or later version is recommended)

## Downloading from an off-campus location

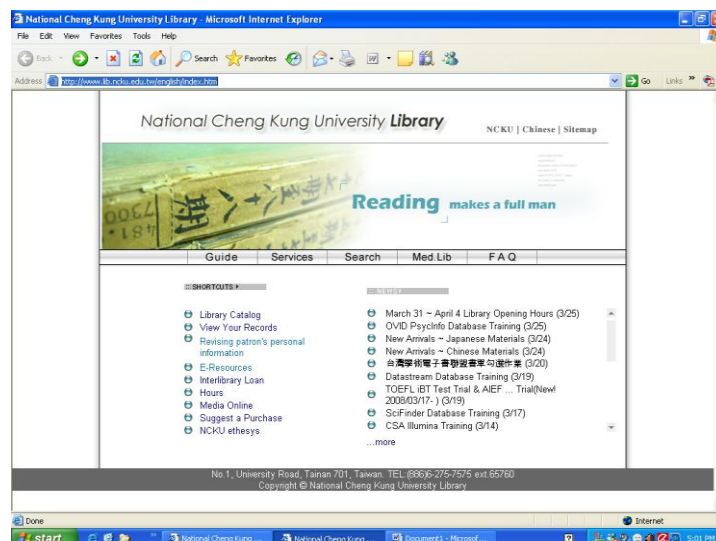

If you are downloading from an off-campus location, you will have to change your LAN settings:

Go: Tools --> Internet Options --> Connections --> LAN Settings --> (tick "proxy server") -->  
Address: rpa.lib.ncku.edu.tw --> Port: 3128

You will then have to enter your student number as the username, and your library password (tends to be the last four digits of your passport number).

**Step 2:** Select E-Resources and log in with your student ID and the last four digits of your passport (or whatever password you have for the library's system)
